

Solar air conditioning in Gothenburg Sweden

Overview

How much solar power does Gothenburg have?

Seasonal solar PV output for Latitude: 57.7065, Longitude: 11.967 (Gothenburg, Sweden), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 6.05kWh/day in Summer.

Does Gothenburg's climate affect solar energy production?

Despite its potential for solar power generation, Gothenburg's climate presents some challenges that could impact energy production efficiency from photovoltaic panels. Cloudy days can reduce available sunlight, while heavy snowfall may cover panels and obstruct their ability to absorb light effectively.

Where is solar power produced in Sweden?

In Gothenburg, Västra Götaland County, Sweden (latitude 57.7065 and longitude 11.967), solar power generation varies across the seasons due to its location in the Northern Temperate Zone.

How many solar PV locations are there in Sweden?

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 172 locations across Sweden. This analysis provides insights into each city/location's potential for harnessing solar energy through PV installations. Link: [Solar PV potential in Sweden by location](#)
