# **Solar base station batteries in the Democratic Republic of Congo**

## Overview

---

Can the Democratic Republic of the Congo produce lithium-ion battery cathode precursor materials?

London and Kinshasa, November 24, 2021 – The Democratic Republic of the Congo (DRC) can leverage its abundant cobalt resources and hydroelectric power to become a low-cost and low-emissions producer of lithium-ion battery cathode precursor materials.

What does Kamo copper & crossboundary energy have in common?

Kamo Copper S.A. and CrossBoundary Energy have signed a power purchase agreement to provide a 30 MW baseload renewable energy supply to Kamo-Kakula Copper mining complex in DRC. The renewable energy system will include a 222 MWp solar PV system and a 123 MVA/526 MWh battery energy storage system, offsetting significant fuel generator usage.

What does Kamo copper's 30 MW solar+storage project mean for Africa?

Kamo Copper's landmark 30 MW solar+storage project in DRC sets new standard for clean energy in African mining, cutting emissions and powering Africa's largest copper mine.

What is a solar PV & batteries baseload project?

The renewable energy system will include a 222 MWp solar PV system and a 123 MVA/526 MWh battery energy storage system, offsetting significant fuel generator usage. This agreement marks a significant step towards sustainable mining practices as the first solar PV and batteries baseload project in Africa.

## Solar base station batteries in the Democratic Republic of Congo

[Kamoa Copper and CrossBoundary Energy sign agreement ...](#)

3 April 2025, Kolwezi, The Democratic Republic of Congo -- Kamoa Copper S.A. and CrossBoundary Energy have signed a power purchase agreement (PPA) to provide baseload
