Solar container outdoor power Sales in Bogota

Overview

What is the solar PV installed capacity in Colombia?

The solar PV installed capacity in the country has increased significantly in recent years. According to the International Renewable Energy Agency 2024, the installed solar PV capacity grew by more than twofold. The installed solar PV capacity in Colombia reached 676 MW in 2023.

How much solar power does Colombia have in 2024?

In February 2024, the Government of Colombia announced that it had awarded 4.4 GW of solar PV capacity, which accounted for 99% of all renewable generation capacity offered in its latest auction.

Where does Colombia's energy come from?

The majority share of renewable energy is expected to come through solar energy resources due to the high solar energy potential of the country, as it is located near the equator. Recently, hydropower has been the dominant source in Colombia's energy generation mix, accounting for over 70% of the total share.

What is Enel Colombia doing in 2024?

Furthermore, in February 2024, Enel Colombia announced that it inaugurated the 187 MW La Loma solar farm in the Colombian department of Cesar. The USD 126 million (EUR 116.9 million) project installed over 400,000 solar panels, enabling the plant to generate around 420 GWh of electricity per year.
