

# Solar double-glass module back connector

## Overview

---

How to connect a photovoltaic module to a column?

and welding connection can be used between beams and columns. The connection between photovoltaic module and photovoltaic module bracket should be in the form of fixed aluminum alloy press block standard parts, rail groove insertion or bolt fixing, and the module fixing bolt should be made of stainless steel. Photovoltaic module supports require re.

Can solar modules be used in outer space?

n Condition 4.1 Installation Position and Working Environment JA Solar modules are intended for use in terrestrial applications, no outer space use. Do not use mirrors.

How to unpack JA Solar PV modules?

“Standard Unpacking Instruction of JA Solar PV Modules”. Do not lift the modules by grasping the module’s junction box or electrical leads in any condition. Do not stand or sit on the modules. Do not drop the modules on another module. Do not place any heavy objects on the modules to avoid glass breakage. Be cautious when setting the modules.

Which clamp is used on the sided module?

clamp used on the sided module ( $X$  = The height of module frame) Clamp B The clamp used on the middle module Figure 1 Mounting detail (Units: mm) The JA limited warranty will be invalid if the substandard clamp is used (such as clamp height mismatch with module
