

Solar installation cost per watt

Overview

How much does a solar panel cost per watt?

This compares with low cost solar cell panels that are priced at \$1/watt. PEC cell STH efficiency of 10% was used for the baseline system.

How much does a solar panel installation cost?

“Generally in the United States, the average cost of solar panel installation will be between \$15,000 and \$30,000,” explains Krystal Persaud, cofounder of Wildgrid Home, an online home electrification education platform designed to assist homeowners in transitioning away from fossil fuels. Of course, this number represents a large range.

How do you calculate solar cost per watt?

Calculating solar price per watt is pretty simple. Simply divide the cost of the system (in dollars) by the size of the system (in watts). $PPW = \text{System cost} / \text{System wattage}$ Now, solar systems are typically sized in kilowatts (kW), so you'll have to multiply by 1,000 to convert to watts.
