

Solar panels in Jerusalem

Overview

How many residential buildings in Israel have gone solar?

Only a handful of residential buildings in Israel have gone solar due to multiple obstacles, one of which is that a residents' committee cannot secure a bank loan. An apartment building fitted with solar panels (but not storage) in the southern city of Beersheba, through the Sun for All initiative. (Yuval Pan).

Could a green track Help a home install a 15 kilowatt solar system?

A green track already enables any home installing a 15-kilowatt system anywhere in the country to get to the front of the queue with minimum bureaucracy. Eifer told The Times of Israel it took just a few weeks from deciding to go solar to connect to the grid.

Are solar panels a good investment?

Together, they will generate 1.6 gigawatts of installed capacity — a tenth of what's needed to reach the government's goal of generating 30 percent of electricity from renewables by 2030. Energy Minister Eli Cohen told a press conference in Jerusalem that solar panels promised a return on investment of at least 15% annually over 25 years.

Can solar panels be installed on a single family home?

Solar panels on a single family home. (Smileus at iStock, Getty Images) Varied tariff options, shortened payback periods, tax incentives, and fast-track connection to the grid were among several steps announced Tuesday by the Energy Ministry to launch a campaign to get solar panels onto 15 percent of Israel's residential roofs by 2030.
