# **Solar panels on the roof of self-built villas**

## Overview

---

What is a rooftop solar system?

A rooftop solar system consists of solar photovoltaic (PV) panels mounted on the roof of a building. These panels absorb sunlight and convert it into electricity, reducing or even eliminating your dependence on traditional power sources.

How does a rooftop solar system work?

Once permits are in place, the actual Rooftop Solar Installation begins. Mounting structures are fixed to the roof, solar panels are installed, and all components are connected. Wiring is done carefully, ensuring safety and reliability, and then the system is connected to your home's electrical panel.

Should you install solar panels on your roof?

Installing solar panels on your roof can significantly reduce your energy bills and carbon footprint. Learning how to install solar panels on roof empowers homeowners to take control of their energy consumption while contributing positively to the environment.

How much does a solar roof cost?

The cost of a solar roof varies, but averages between \$15,000 and \$40,000 depending on the size of the solar panel system. Getting quotes from a solar company or checking with the National Renewable Energy Laboratory can give better cost estimates. How much money do solar panels save per month?
