## **RMB per watt**

## Overview

---

How much does a 5kw Solar System cost in China?

Prices have dropped significantly, but quality varies widely across suppliers and system types. A complete 5kW solar system in China costs ¥15,000-¥30,000 (\$2,100-\$4,200), with Tier-1 panels from Longi or Jinko at ¥0.9-¥1.3 (\$0.13-\$0.18) per watt. Installation adds 10-20% to the total price.

How much does a solar system cost in China?

Component Checklist: Solar systems in China offer exceptional value at 40-60% lower costs than Western markets. Quality systems start at ¥15,000 (\$2,100) with 6-8 year payback periods. This article will take you through solar system price in china: how much does it really cost, but the quality varies greatly by supplier and system type.

How much will PV electricity cost in China by 2015?

According to our analysis, if electricity prices of the provinces remain unchanged, the cost of PV electricity could be reduced to 0.52-1.22 RMB/kWh by 2015, which is comparable with the grid prices in regions with large PV capacity and high electricity prices, such as Guangdong, Beijing, and Shanghai.

How much does PV cost per watt?

With the backdrop of price reductions across the entire industry chain, the bidding price of PV modules by central and state-owned enterprises has dropped to 0.80 yuan per watt, and the comprehensive investment cost of residential PV power stations is about 1.9 yuan per watt, improving the economic viability of investing in PV power stations.
