

Solar power storage in China in Bahrain

Overview

Will Saudi Arabia develop a solar power plant in Bahrain?

Riyadh-based Acwa Power and Bahrain's state oil firm Bapco Energies have agreed to develop a solar power plant with large-scale battery energy storage in Saudi Arabia's Eastern Province that will supply electricity to Bahrain.

What is Bahrain's national energy strategy?

In August, the Electricity and Water Authority announced the start of work on the country's first solar power plant, with capacity of up to 150 megawatts. Bahrain's National Energy Strategy focuses on improving energy demand efficiency, diversifying the national energy mix, including renewables, and ensuring secure and competitive access to energy.

How many gigawatts will Bahrain's solar plant generate?

The solar plant will have generation capacity of up to 2.8 gigawatts, developed over several phases, the companies said in a joint statement on Tuesday. Electricity generated by the plant will be transmitted to the load centre of Bapco Energies in Bahrain, accelerating the country's transition to renewable energy sources.

Will Saudi Arabia become an energy export hub?

The companies said the project will reinforce Saudi Arabia's "leadership in the energy sector by becoming an energy export hub, and by supporting other countries in achieving their emissions-reduction targets". Bahrain, the Gulf's smallest oil producer, aims to reduce carbon emissions by 30 per cent by 2035 and reach net zero by 2060.
