

Spanish solar conductive glass

Overview

What is Solar Photovoltaic Glass?

This article explores the classification and applications of solar photovoltaic glass. Photovoltaic glass substrates used in solar cells typically include ultra-thin glass, surface-coated glass, and low-iron (extra-clear) glass.

Where is solar glass used?

Demand for glass is rapidly increasing in the architectural sector. Solar glasses are used in both residential and non-residential applications. Europe and Asia Pacific are key regional markets for solar glass. Europe is leading the solar glass market while China is foreseen to exhibit the highest growth rate during the forecast period.

Which solar glass products are suitable for thin film photovoltaic technology?

Range of coated solar glass products designed for thin film photovoltaic technologies, including a comprehensive choice of TCO glass (Transparent Conductive Oxide coated glass) products with haze and conductivity levels optimised to suit each specific thin film photovoltaic solar technology, also available on low iron glass.

Why is Solar Photovoltaic Glass so popular?

With global attention on environmental protection and energy efficiency steadily rising, the demand for solar photovoltaic glass in both commercial and residential construction sectors has significantly increased. The desire to reduce energy costs and carbon footprint has driven the widespread adoption of solar photovoltaic glass.
