

# Substation battery cabinet

## Overview

---

What is a substation battery?

Batteries ensure all critical substation loads will always operate. In a substation, the primary source of power comes from your AC power supply. But you cannot completely rely on your AC power supply. If a substation's transmission line or generation source goes offline, you'll lose power.

What is a typical battery cabinet?

A typical cabinet integrates batteries, racking and chargers into an indoor (NEMA 1 or IP21) or outdoor (NEMA 3R or IP54) rated enclosure. There are many different options and accessories available, making every system unique and built to your site-specific needs.

How do you choose a battery for a substation?

A battery that not only packs enough energy but also provides the discharge characteristics to operate substation equipment is needed. Specify batteries with enough amp-hour capacity to support the continuous load for 8 hours and momentary load (such as breaker and switch operation) for a minute or more.

What is a HindlePower Battery Cabinet?

HindlePower's Battery Cabinet is designed to maximize DC system performance and battery life, saving YOU time and money. The EPIC series battery cabinet offers a NEMA 3R and NEMA 1 modular design, with built in intelligence, will safely house any combination of batteries, chargers, DC distribution, and/or other ancillary equipment.
