# Supplying base station power supplies to Huawei

## Overview

---

What is Huawei site power facility?

Huawei Site Power Facility offers energy-efficient, low-carbon power supply solutions, enabling carriers to build environmentally sustainable, resilient networks for modern telecommunications infrastructure.

What is Huawei PowerCube?

To address this situation, Huawei offers PowerCube, an industry-leading hybrid power supply solution. Built along the lines of a Micro-Grid Energy System (MGES), it comprises four elements – power generation, control, monitoring, and energy storage.

What green energy solutions does Huawei offer?

Huawei provides a variety of green energy solutions, including solar scenarios that feature maximum power point tracking (MPPT) solar energy controllers, and hybrid solutions that combine renewable and conventional energies with specific energy-storage systems.

How to choose a power supply system for a communications station?

The power supply system should meet the needs of the communications station, and its cabling should be as simple as possible to facilitate operation and maintenance. The low-voltage AC power supply system should use 3-phase 5-wire or 1-phase 3-wire for power supply.
