

# Taipei sells container energy storage

## Overview

---

How many MW of battery-based energy storage will Taiwan have by 2025?

Taiwan aims to accumulate a total of 590 MW of battery-based energy storage by 2025, with a target of 160 MW managed and procured by state-owned Taiwan Power Company (TPC), and 430MW to be developed via private-sector, independently operated storage facilities.

What is Taipower's new energy storage system?

The new energy storage system adds power for renewable energy! In response to international energy transitions and net-zero emission trends, Taipower is actively developing diverse energy solutions.

Which energy storage system in Taiwan can measure system inertia?

Furthermore, Taipower has introduced Function of Periodic Power Modulation (FPPM) technology at the Dongshan energy storage system, making it the only energy storage system in Taiwan capable of measuring system inertia.

How many MW will Taipower have in 2025?

A Taipower representative stated that the government's 2025 goal of establishing 1,500 MW of energy storage includes 500 MW from private developers integrating energy storage with photovoltaic power, 160 MW of energy storage systems built by Taipower, and an additional 1,000 MW from private resources aggregated through the Energy Trading Platform.
