

Tax rate for solar container lithium battery packs

Overview

What is the tariff on lithium ion battery imports?

As there is also a 3.4% general tariff on lithium-ion battery imports, the full tariff paid by importers will go from 10.9% to 28.4%. Lithium-ion battery modules, packs, and container blocks are generally categorized under the import code 8507.6020 if they are used for non-EV applications.

How much will China impose on lithium-ion batteries in 2026?

A 3.4% global tariff on lithium-ion batteries, regardless of origin. A Section 301 tariff targeting Chinese imports, currently at 7.5%, is scheduled to rise to 25% by January 2026. Additional tariffs imposed under recent trade actions push the total tariff on Chinese lithium batteries to approximately 82% by 2026.

What is the import code for lithium ion batteries?

Lithium-ion battery modules, packs, and container blocks are generally categorized under the import code 8507.6020 if they are used for non-EV applications. As such, we believe that this is the code that this tariff change will apply to.

How will US tariffs affect Chinese lithium batteries in 2025?

U.S. tariffs on Chinese lithium batteries have become a critical factor shaping the global battery market in 2025. These tariffs directly impact lithium-ion batteries' cost, supply chain, and competitiveness, essential for electric vehicles (EVs), renewable energy storage, and consumer electronics.
