**The roof can be equipped with  
solar glass room**

## Overview

---

Do you need a sunroom with a glass roof?

You don't even have to go out into the backyard when you have a sunroom with a glass roof. Instead you can relax in comfort while you watch the stars pass overhead. These sunrooms are easy to install, and you can seamlessly add them onto existing structures. These rooms let you get "out" into nature while being protected from the elements.

Do solar roofs need a specialized installation?

Solar Roof systems come in a range of UV-stable, fade-resistant colors and patterns in keeping with design needs. Helpfully, no specialized installation is required, and once installed, their elements require no maintenance because they are treated with an anti-soiling coating that reduces the accumulation of dust and dirt on surfaces.

Are solar roofs a good option for low-density homes?

Lower-density homes with solar roofs are not a new phenomenon; however, recent technological advances give builders and architects the option of adopting green initiatives without compromising a home's design. Solar Roof systems come in a range of UV-stable, fade-resistant colors and patterns in keeping with design needs.

Is solar glass a good option for urban slender high-rises?

In particular, in dense urban areas where space is limited, Solar Glass offers an economical and architecturally sound opportunity to incorporate renewable energy into slender high-rises.
