There are several base station sites in total

Overview

How many base stations are there in the world?

Phil Marshall, chief research officer at Tolaga Research, estimates the global number of base stations at 6.5 million sites, while Chinese equipment vendor Huawei puts the number at 7 million. Obviously China hasn't deployed nearly all of the world's base stations. The confusion arises from how you define base station.

How many 5G base stations are there in China?

[Photo/VCG] BEIJING - The number of 5G base stations in China exceeded 4.04 million at the end of August, data from the Ministry of Industry and Information Technology showed Wednesday. The figure accounted for 32.1 percent of the total number of mobile base stations nationwide. The number of 5G mobile subscribers hit 966 million in China.

What are the main types of base stations?

There are three main types of base stations, each with a specific purpose. The Macrocell is the largest type and provides the main coverage for mobile phone networks. The Microcell is used to improve capacity in areas where demand to make calls is high, such as shopping centers.

How many 5G base stations will China deploy in 2023?

An MIIT minister said that China's operators will deploy 600k 5G base stations in 2023, taking total to 2.9m. Astonishing scale of investment and execution in #China for #5G, creating a pervasive connectivity fabric that is driving massive digital transformation. 1.4 million base stations for 5G alone!!!
