

# **Tunisia Smart Grid Huawei 5G Base Station**

## Overview

---

What is Huawei smart grid LTE-G private network solution?

These development objectives require a future-oriented communication infrastructure network. Huawei Smart Grid LTE-G Private Network Solution uses the mainstream 3GPP spectrum and supports low latency, wide coverage, one-network multi-service capability, easy deployment and maintenance, open collaboration, and 5G-oriented evolution.

What is State Grid Jiangsu?

Relying on 3739 dedicated base stations, State Grid Jiangsu has built the largest and most capable broadband wireless private network in China that covers all major power supply areas in Jiangsu.

Which countries are building digital power grids?

Leading electric markets including China, US and EU all have the vision of building digital power grids. These new grids will support the reliable, flexible, and economical transmission of power and information flows.
