

# Tuvalu Energy Storage Power

## Overview

---

Why does Tuvalu need a solar project?

This solar project echoed Tuvalu's action during COP15 and sent a symbolic message about the importance and necessity of global and concerted actions worldwide to promote renewable energy and mitigate climate change impacts to save threatened countries. However, the majority of Tuvalu's energy sources are imported fossil fuels.

How TEC is powering Tuvalu with renewable resources?

TEC has set a vision of "Powering Tuvalu with Renewable Resources" and this align well with the Tuvalu Government set target of 100% renewable energy by 2025. All the islands of Tuvalu are on 24/7 power supply and the access rate is 100%. The outer islands are powered by hybrid solar PV system with diesel generator on standby.

What is Tuvalu's energy supply?

In 2021, fossil fuels accounted for 96 percent of Tuvalu's total energy supply, while solar and other renewable energy sources accounted for 4 percent. Tuvalu's economy is therefore highly vulnerable to fuel prices' volatility, which is why it is critical to find alternative sources of energy for the country's electricity supply.

Does Tuvalu have solar power?

All the islands of Tuvalu are on 24/7 power supply and the access rate is 100%. The outer islands are powered by hybrid solar PV system with diesel generator on standby. For the main island of Funafuti there are some solar PV systems tied to the grid with diesel base load generators.
