

Uninterrupted power supply solar progress plan for solar container communication stations

Overview

How does a solar power supply work?

Solar or power grid electricity powers the base station and charges the batteries, with solar having priority. Only when neither proves sufficient will the batteries be utilized. Huawei's PowerCube hybrid power supply solution has been widely recognized for its remote-station viability.

Can a remote base station power supply be uninterrupted?

By Zhang Hongguan & Zhang Yufeng Uninterrupted power supply for remote base stations has been a challenge since the founding of the wireless industry, but alternative sources have a chance of succeeding where traditional solutions have failed.

What is onsite power supply?

Dual power Traditionally, when power outages are frequent, onsite power supply combines mains, batteries and generators. Normally, the mains supply power while charging the batteries. When the mains fail, batteries take over; diesel generators are only utilized if the batteries prove insufficient.

Uninterrupted power supply solar progress plan for solar container

Solar Power Supply System for Communication Base Stations ...

45 sets of 8.7kw communication base station power supply system in Myanmar Project Time: 2015 Installation Site: Myanmar Configuration: 8.7KW solar panels, 48V2000Ah ...
