

# **Vienna Energy Storage solar Power Station**

## Overview

---

How many photovoltaic plants does Wien Energie have?

The utility company now operates over 260 photovoltaic plants with a total capacity of nearly 60MW and is expanding its position as Austria's leading solar energy provider. "Wien Energie is driving the city's climate protection efforts.

How much does a photovoltaic battery storage system cost in Austria?

The total inventory of photovoltaic battery storage systems in Austria therefore rose to 11,908 storage systems with a cumulative usable storage capacity of approx. 121 MWh. For 2020, a price of around € 914 per kWh of usable storage capacity excl. VAT was charged for PV storage systems installed as turnkey solutions.

What is Vienna energy's solar energy expansion programme?

Wien Energie's solar energy expansion programme is based on stakeholder participation and cooperation. Vienna's largest community-funded solar power plant went into operation in Unterlaa in May 2020. Thousands of climate activists from Vienna and the surrounding region bought into the project by purchasing investment packages.

Does Austria have a market for energy storage technologies?

A study 1 carried out by the University of Applied Sciences Technikum Wien, AEE INTEC, BEST and ENFOS presents the market development of energy storage technologies in Austria for the first time.
