

Warsaw solar container battery manufacturer

Overview

What is the largest battery plant in Europe?

It built the first battery production plant in Europe and the largest in the world on approximately 1,000,000 square meters of land. The LG Energy plant in Wroclaw, Poland, has an annual capacity of 86 GWh, which is enough to power approximately 1.2 million electric vehicles.

Why did LG choose Poland for its EV battery production system?

For these reasons, LG Energy Solution has chosen Poland as the primary production base for its global EV battery production system. It built the first battery production plant in Europe and the largest in the world on approximately 1,000,000 square meters of land.

Where are EV batteries made?

Poland, located between Western, Central, and Eastern Europe, is the heart of the European EV market, with easy access to customers, low costs, and a large pool of skilled workers. For these reasons, LG Energy Solution has chosen Poland as the primary production base for its global EV battery production system.

Where is the world's largest battery production plant located?

Since 2016, the company has operated the world's largest battery production plant in Poland to prepare for the growing electric vehicle market and to lead the European market. The company has also announced that it will increase its production capacity to 100 GWh by 2025 through further plant expansion.
