

Western Europe New Energy Storage Cabinet

Overview

How many energy storage facilities are there in Europe?

Europe currently has 913 energy storage facilities in operation, with a combined capacity of 67 GW. The predominant technology is mechanical storage (54.6 GW) with pumped storage hydropower plants. However, electrochemical storage, including lithium - ion and flow batteries, is catching up, at 11 GW.

What is the European energy storage inventory?

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources. Energy storage helps to balance supply and demand. The European Energy Storage Inventory is the first of its kind at European level to show all forms of clean energy storage solutions.

How many megawatts of energy storage were installed in Europe in 2024?

Historic and forecasted megawatt installs of energy storage across Europe. Image: EASE / LCP Delta. A total of 11.9GW of energy storage across all scales and technologies was installed in Europe in 2024, bringing cumulative installations to 89GW.

How can European policymakers help the battery storage sector?

RecommendationsHow can European policymakers help the battery storage sectorBattery storage systems are essential for strengthening the EU's energy security and competitiveness by enhancing flexibility, providing ancillary services to secure the grid, maximising the use of renewable energy, and effectively dealing with energy pr
