# What are the Prague energy storage power stations

## Overview

---

Are there any large-scale electricity storage projects in the Czech Republic?

There are no other larger-scale electricity storage projects currently being developed in the Czech Republic. However, the Czech government provides subsidies to household projects consisting of photovoltaic panels with electricity storage systems.

Is there a future for energy storage in the Czech Republic?

Despite the ongoing discussions, there is no significant development in the area of energy storage. In 2015, the Czech Government adopted the National Action Plan for Smart Grids ("NAPSG") prepared by the Ministry of Industry and Trade under principles set out in the update of the State Energy Concept, which was also introduced in 2015.

Why do we need a charging station in the Czech Republic?

"We believe that this type of charging station will contribute to developing the charging infrastructure in the Czech Republic thanks to its ability to compensate for the lack of electricity quickly and without taking up much space.

Who owns the energy companies in the Czech Republic?

All of them are owned by CEZ Group, which is the largest energy group in the Czech Republic and controlled by the Czech government. In 2013, CEZ Group was considering constructing a new pumped hydro storage project; however, the project was postponed due to the low profitability of the investment.
