US electric vehicle maker Tesla shipped Megapack energy storage systems from its Megafactory in Shanghai's Lin-gang Special Area to Australia on March 21, according to the company.

Where will Tesla's Megapack energy storage systems go?

The first batch of Tesla's Megapack energy storage systems produced at its Shanghai Megafactory is set to depart the port heading for Australia on Friday, the company told the Global Times on Friday. The batteries produced at the Shanghai facility will serve both the domestic and wider Asia-Pacific markets.

What is Tesla's new energy storage megafactory?

The energy storage Megafactory is the first of its kind built by Tesla outside the US and the company's second plant in Shanghai, began mass production just eight months after breaking ground, serving as a new example of "Tesla speed" in China, Tesla said in a press release sent to the Global Times earlier in February.

Will Shanghai megafactory boost Tesla's battery storage deployments?

With an initial output of 10,000 units annually, equal to about 40 GWh, the Shanghai Megafactory has the potential to significantly boost Tesla's battery storage deployments. As per a report from Xinhua News Agency, Tesla is expecting its energy deployments to rise 50% year-over-year this 2025.
