

# What is the cooling machine of the liquid-cooled energy storage cabinet

## What is the cooling machine of the liquid-cooled energy storage cabinets

---

### [The \\$3.3 trillion question: Can data centres take the heat?](#)

Extreme heat, drought and other climate hazards could raise cumulative annual running costs at data centres in operation today by \$3.3 trillion by 2055.

### What new water circularity can look like for data centres

Data centres cause accelerating water usage, requiring innovative water circularity solutions; however, collaboration will be critical for their success.

[Learn More](#)

### Circular water solutions key to sustainable data centres

A key reason for the high-water consumption is limited water reuse in cooling. During the cooling process, part of the freshwater evaporates, and the remaining water ...

[Learn More](#)

### How sustainable cooling could help combat the

## climate crisis ...

Sustainable cooling targets efficiency improvements to cooling solutions alongside measures that lower ambient temperatures in buildings and urban environments.

[Learn More](#)

## Climate change: 7 ways the world can cope with heatwaves

As #climate change intensifies heatwaves, #cities are experimenting with cooling techniques and initiatives, including urban greening and categorization.

[Learn More](#)

## 6 ways data centres can cut their emissions: A case study

Data centres are responsible for 1% of energy-related greenhouse gas emissions. Here's how to cut those emissions and still deliver on the promise of AI.
