Are solar panels paired with a home battery energy storage system?

By Sam Wigness | Dec 4, 2025 In the last year, nearly two-thirds of solar.com customers paired their solar panels with a home battery energy storage system (aka BESS). Why?

.

Which battery storage systems work best?

Because there's no perfect battery for every solution, here are the battery storage systems that solar.com Energy Advisors find work well with homeowners who invest in solar and battery. From a hardware and software perspective, the Tesla Powerwall 3 is an outstanding product.

Can solar power be stored in a battery?

Existing solar systems typically have solar inverters, which change the DC power produced by panels to AC power that can be consumed in your home or exported onto the grid. But if you want to store that AC power in a battery, it needs to be inverted again to DC power.

Which inverter is best for home battery storage?

The leading inverter company, not surprisingly, offers a fantastic home battery storage solution in the Enphase IQ Battery 5P. This smaller capacity battery comes in at a lower price point than larger capacity competitors, and can often get the job done in Time-of-Use shifting applications for bill savings.
