Color roles

Color roles are like the 'numbers' in a paint-by-number canvas. They're the connective tissue between elements of the UI and what color goes where.

[Learn More](#)

Material Design

Build beautiful, usable products faster. Material Design is an adaptable system--backed by open-source code--that helps teams build high quality digital experiences.

[Learn More](#)

Color

The Material color system includes: Built-in set of accessible color relationships For example, a dark surface color is algorithmically paired with a light text label color so the UI ...
