

Where are the new energy solar sites in London

Overview

Will the London Underground be powered by solar energy?

Transport for London (TfL) has signed a major new deal to power the London Underground using clean solar energy, as part of a long-term plan to decarbonise the capital's transport network and support biodiversity. A new solar facility will be built in Longfield, Essex, by EDF Renewables UK through its subsidiary Longfield Solar Energy Farm Limited.

Can London get more solar?

The Mayor's Solar Action Plan sets out how City Hall programmes are expected to more than double London's current solar energy capacity. But the Mayor thinks London can, and should, go further than this and wants to provide support to local government, businesses and others to install more solar in London.

Is the UK building a new solar park near South Ockendon?

The UK is building a new solar park near South Ockendon, a half-hour train ride from central London. EPA.

What is the London solar opportunity map?

The London Solar Opportunity Map is based on the interpretation of LiDAR data (where laser technology is used to measure distances) collected and made available by the Environment Agency. It provides an initial estimate of the amount of electricity that could be generated from panels both on rooftops and at ground level.
