

Which companies have uninterruptible power supply in Bhutan

Overview

Why does Bhutan have a large hydropower sector?

Large hydropower development. After meeting its domestic consumption needs, Bhutan exports around 70% of the total power it generates each year to India. The power sector is the largest source of the government revenue and the premier contributor to the country's gross domestic product. 4 Hydropower development and exports have underpinned the.

What happened to Bhutan's energy sector?

In 2002, Bhutan's energy sector went through a major restructuring to separate commercial management and ownership from the government.

What does the Bhutan Electricity Authority do?

As the power sector regulator, the Bhutan Electricity Authority is responsible for setting tariffs; establishing and enforcing technical, safety, and operational standards; issuing licenses; and monitoring other regulatory functions.

How much power does Bhutan use?

Power generation in Bhutan relies almost exclusively on hydropower. The total installed capacity of existing hydropower plants is 1,488 megawatts (MW). Since all of the existing plants are run-of-the-river types, the total generation drastically drops to about 300 MW during the winter dry season (December-March) due to low water levels.
