

Which company in Türkiye is engaged in containerized liquid cooling energy storage

Overview

Who built the first liquid cooling overcharging station in Türkiye?

On March 15, Türkiye's leading energy company Enerji SA, together with Zebra and Huawei Digital Energy, jointly built the first liquid cooling overcharging station, which was officially launched in Türkiye. The three parties jointly held a media conference and held the opening ceremony of the charging station.

What is a liquid cooling system?

The integrated frequency conversion liquid cooling system helps limit the temperature difference among cells within 3 °C, which also contributes to its long service life. It has a nominal capacity of 372.7 kWh with a floor space of just 1.69 square meters. The system is suitable for inverters with operating voltages ranging from 600 to 1500 volts.

How long does a 600KW liquid cooled overcharging host last?

Meanwhile, as the core component of the overcharging solution, the 600kW liquid cooled overcharging host provided by Huawei Digital Energy has a service life of up to 10 years, providing an efficient, fast, and reliable charging experience.

What is the future of energy storage?

Moreover, there have been significant investments in battery technologies, specifically targeting the storage and the effective use of energy from volatile sources such as wind and solar power. Various projects are underway to integrate energy storage systems into smart grid infrastructure.
