

Withdrawable circuit breaker in Iran

Overview

What is a withdrawable circuit breaker?

fixed-mounted and withdraw able circuit breakers are used for the rated current range from 630 to 6300 A. This means: The low voltage switchboard in withdrawable design represents an extremely accesible standard solution for motor control centers (MCC).

What is a withdrawable panel?

The withdrawable panel design is a proven solution for high-demand and high-safety applications, making it an ideal choice for: Manufacturing Plants – where uptime directly impacts output and profitability. Chemical Processing – where uninterrupted control is crucial for safety-critical processes.

What is a switchboard for Central reactive power compensation?

The switchboards for the automatic central reactive power compensation decreases the overload of the transformers and cables, reduces the power losses and the energy costs. Based on the load structure, they can be equipped with capacitor modules with or without smoothing chokes.
