

# **Zero power inverter in Southeast Asia**

## Overview

---

Which countries will boost Southeast Asia into a major PV market?

The five major PV markets—Vietnam, Thailand, Malaysia, the Philippines, and Singapore—are set to boost Southeast Asia into a major PV market with strong policy push. Vietnam approved the long-discussed Direct Power Purchase Agreement (DPPA) on July 3, 2024, allowing electricity buyers to procure green energy via national or private grids.

Will PV demand grow in Southeast Asia in 2024?

InfoLink projects that PV demand in Southeast Asia will reach 4.5-7.4 GW in 2024, with long-term demand likely growing to 9.7-12.9 GW, suggesting that the Southeast Asian PV market will maintain steady growth in the coming years, becoming a key player in the global energy transition.

Which countries are transitioning to cleaner energy systems?

We are working with Southeast Asia countries such as Indonesia, Thailand, Malaysia and Vietnam to transition to cleaner energy systems. Australia has experienced one of the fastest power system transformations in the world and continues to embrace cleaner energy systems and low emission targets.

Why is Southeast Asia a good place to invest in energy?

Southeast Asia benefits from economic growth, policy support, and international funding but also faces grid integration challenges and competitive pressure from other energy sources.
